Floridians for Solar Choice

A ballot initiative to give Floridians a voice and choice on energy

- **Gives Floridians the freedom to choose their energy sources.** Florida is one of four states that expressly denies citizens and businesses the freedom to buy solar power directly from someone other than a monopoly electric utility.
- **Realizes savings from solar.** Our proposal will expand solar choice by letting any customer choose to power their home or business with solar electricity, choose who provides it, and choose financing options just like they do for cars and houses.
- **Helps move Florida to a cleaner future for our children.** Join us to open solar choice to all Floridians, take control of our power, and ensure a cleaner tomorrow for our children.
